[CA](#) Midterm test and revision
di [CARDINALI ALESSANDRO](#) - venerdì, 3 aprile 2026, 16:43

Dear Students,

On the Moodle page, you'll find a new section: 'Midterm Test 1'. Anyone wishing to take the test must accept the terms and conditions outlined in the section (which are the terms and conditions for official exams), which are presented as a quiz. Once accepted the conditions, please make sure you confirm your submission until the system acknowledges that your choice has been registered. The registration deadline is Wednesday, April 8th, so please do so as soon as possible. Once I know the number of participants, I'll be able to reserve the room and schedule the exact date and time.

In the 'Homework' section, I've added a mock paper for the midterm test. In the current format, the maximum score is 15/15, so the final course score will be the sum of the scores from the two midterms. Partial marks are shown next to the answer boxes there. I'd also like to clarify that anyone who scores higher than 3/15 on the first test, will be able to attempt the second partial test. Further information will be provided when classes resume.

Moreover, I have also uploaded in the 'Homework' folders the solutions for the exercises. I recommend that you look at those to check with your answers, only after having tried hard the exercises. Any questions on the above will be addressed once the lectures resume.

Happy Easter,

Alessandro Cardinali
